

# The Environmentalists

Welcome to San Francisco where true care and friendship for Mother Earth was originated. Remember in the mid sixties when protesters came to rally against the earth-raping corporations? They came, they sat in, they laid down, they carried posters, they cried out about the blasphemy of the controlling military, the polluting factories, the killing of defenseless animals to the point of extinction and they screeched the wrong doings of their parents [oops, that's another story]

Don't remember?!? Well then, you're too damn young!

Nonetheless, it's time for you to stand up and march out there! It's time for you to speak the evils of great corporate America! Those horrendous corporations, oh yes, you'll learn more about them. You have friends out there just waiting to tell you of the corrupt methods of top corporations. They will tell you about the horrendous cruelty to animals. And they will tell you other horror stories of atrocities committed upon your own home - planet earth!

No, you will not allow the spraying of cosmetics into little puppies' eyes, you will not allow factories to toss their wastes into our waters, you will not allow daddy to take the car away [damn, Freud!].

You may have noticed that you have help out here in San Francisco already. Yep, there are now Recycling Corporations, the Environmental Defense Fund, Green Peace, World Wildlife Fund, and a whole network out there to help you, *The Environmentalists*, spread the word!

So, strap on those seat belts, be wary of those dangerous pollutants [no, not beer] and gather up all the incriminating evidence you can find and bring to headquarters for evaluation. RR Headquarters believes you, *The Environmentalists*, are in the perfect position to assist in the efforts to prevent this world from being destroyed!

Are you ready for this enormous task at hand? Are you ready to lay down your lives for the good of mankind and this planet? Are you ready to do whatever it takes to prohibit....Ah, you heard it already....

If you're ready say, "Praise the Road Rally" and go. If not, go home and have some hemlock tea.

# The Environmentalists

I.

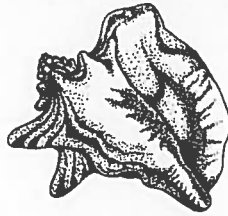

You have just promised to protect the Earth  
And even die. Whatever that could be worth!  
But, what to do first and what is the priority?  
And who amongst you will have the seniority?  
The one whom could manage this significant situation  
One who does not care about the untold trepidation?  
Without warning you hear a scream in the night  
You all turn suddenly and stare with such a fright  
The sirens are screaming throughout the city  
Off you go. For the others there is only pity  
This must be final, this must be the very end  
The Earth is no longer going to be here to defend  
Jumping into your automobile and go  
You start racing up the hill, up Molimo  
Abruptly the Army comes screeching to a halt  
As *scrambled* as they are, it's not their fault  
They are just following standard orders  
Trying to protect the US borders  
It's good you turned left way back then  
As you can see the tank has started to spin  
The sirens are still screeching their mournful sound  
Knowing that it is sure death you are all bound  
You're headed for the Bomb Shelter  
Before you become a bit meltier  
At the **S u b Station** you will **Stop**  
Up you, almost to the very top  
Following the signs along the way  
Terrible to die on such a Green day

2.

You were shielded from the great disaster  
It's a good time to go out and get plastered  
But, the mission you are on is very clear  
To save the earth of which you hold dear  
The message you have received  
Can scarcely be believed  
Finding Greenpeace and their convention  
Is the road you are taking for good intention

# The Environmentalists

You know they are having a rally  
Time to get going and do not dally  
Is it that urgent? Oh, please!  
You have news about the Valdez  
It is destroying the ocean daily  
Can it be stopped? Well maybe  
It would be easier to do some **Planting**  
To save the ones whom are habitating  
But, this is the duty that was **marked** for you  
Hard though it may be, at least it is true!  
Now go and save Mother **Earth**  
Or rue the day of your birth!

3.

**Yahoo!** You know right where they are going to be!  
The Environmentalists are going right here in the city!  
You are going to deliver the message  
About the Valdez's nasty spillage  
After that you will surely be praised  
And Shell Oil Company could be erased  
With new spirit in your assignment  
There is no reason for you to be silent  
After this there could be so much more to do  
Keeping this planet the colors of green and blue  
What about ending the nuclear threat?  
It has been tried, but it's not won yet  
Traveling down the shopping street  
Waving to those you do not meet  
You looked the map, the *street* is very hard to find  
You even checked the legend that is most unkind  
Folding and refolding and looking hither and yawn  
And hoping to get to the convention before dawn  
Nda hent ouy dinf uto hath het oten asw essedm pu

# The Environmentalists

A crambles ti si nda hist si het eat ni oury puc  
Henw ti si iguredf uto heret si omethings ouy houlds nowk  
Het lacep aym eb losedc os heckc ellw herew ouy og

4.

Okay, now you know that the mission is not complete  
You were not able to see Greenpeace at the meet  
The next step is to have a clandestine rendezvous  
With Rose and her stories for earth to be rescued  
She works at a place where Nations come together

Your feeling quite chipper and light as a feather  
Because soon you will be able to get a real story  
That you can use to deliver with all your glory  
To the folks who are in your same fight  
And want to help you with all their might  
Though some folks you find **uncivil**  
They are the **center** of their evil  
Even though you didn't *phone* her first  
You know where she quenches her thirst  
With this very upbeat attitude  
You have moved your *latitude*  
Meet Rose at her favorite coordinates  
Pay much heed to the **chlorinates**

5.

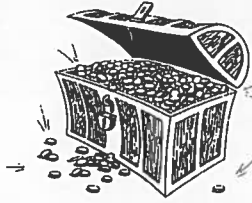

Oh my, Rose has just been kidnapped  
And that corrupt executive has snapped!  
A million dollars to get her back  
You're about to have a heart attack  
Where would such money come from?

# The Environmentalists

Does Greenpeace have a type of fund?

She must have some powerful information  
For these people to do such mortification  
There has to be two involved  
How on earth did this evolve?  
Another phone call gets you the money  
Now you can get out of this bologna  
Was the message clear enough  
To get you there and drop the stuff?  
All traveling once again in the car  
From the sound of his voice it can't be far  
Up to Market a left is taken  
Hoping the man is not fakin'  
**Four** trees sitting in a row  
A right seems the way to go  
Give him the money and have a seat  
Rose hopefully will be all in one piece

## 6. DO THE PUZZLE

Rose is back and will not speak  
Not even the things of this week  
She has been through too much  
And you are on your own as such  
You'd like to forget all the world's woes  
Could you sit back and see how it all goes  
No, this is definitely not in your nature  
You need to get concern into legislature  
It sure is a *puzzling* thought  
Good thing a brain you brought  
But, it's all figured out  
You are off with a shout  
See the flyers on the bungy jump  
Go to the end as people you bump  
Climb the stairs and check the marquee  
And find the key to your great story

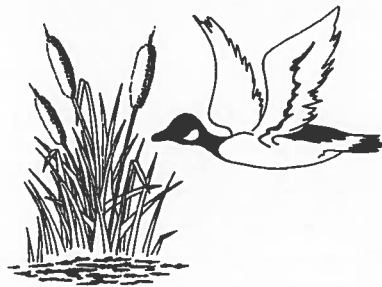

# The Environmentalists

7.

You've played with creatures large, not small  
You stared at the tourists at the outside mall  
You even learned about the world underwater  
Saving the animals and the sea really do matter  
In the process you received a treat  
From Donald Duck, that was neat

He told you about his friends who are quite miserable  
And gave you the directions to the *palace of crystal*  
So that you can assist in reviving the old **nursery**  
In order that his friends can have their anniversary  
Feeding and watering various types of plant life  
Might be just the thing to end all their strife  
A good deed you hope might go unpunished  
Those that have been **punished** are finished  
And they have turned left and headed **south**  
**One of you is speaking about a blabbermouth**  
**That wanted to cut trees for the Sierra Club**  
**But they kicked him out with a big snub**  
**As you recall there were not in Unison**  
**On cutting the trees for whatever reason**  
**They were definitely Divided and decided to argue all day**  
**To prevent forest fires the trees should be Felled anyway**

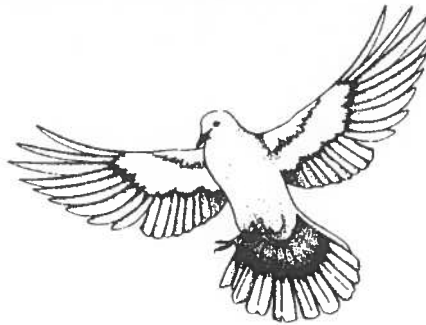

## The Environmentalists

Although he had the correct assessment, he spoke too much  
He even went to the **President** where upon he got into a clutch  
The secret agents were far too *conservative*  
And did not allow him another day to live  
Someone, just the other day put flowers on his grave  
Now people in the Sierra Club are very well behaved

8.

Waving and leaving them happily  
The nursery turned out quite snappy  
Restoration or Preservation  
What is your next motivation?  
You have tried to fight the huge oil companies  
Combating the needs versus wastes ironies  
People want oil and fuel and don't much care  
How they get it as long as the price is fair  
The only way to make this work  
Is the people get up and perk  
You need an idea that they can follow  
Saving some birds and even some swallows

Might be just the right thing you need  
To gain some sympathy with do speed  
From the masses in this town  
The city that once was crown  
Is all but lost in the fog  
[Really it's allot of smog]  
There are some *grasslands* close by  
Where the birds still do fly  
Up and up and around you go  
Hoping for you they will put on a show  
The view should be most inspiring  
Something you have never found tiring  
You just might want to get out and see  
All that the world really could be

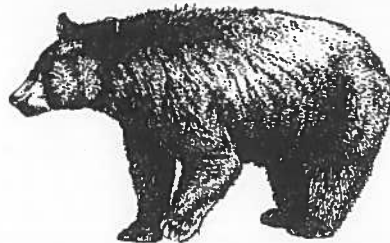

# The Environmentalists

9.

Lions and Tigers and Bears, Oh My!  
They need your help, so go fly!  
The earth is quite a puzzle to fix  
Here's hoping you undid the mix

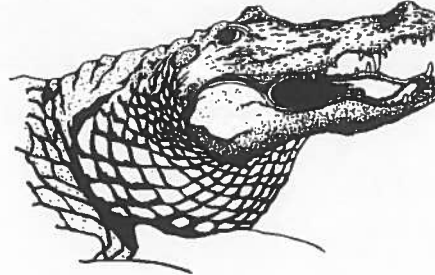

Because, if you were not able to  
The rest of your mission you rue  
Animals were meant to be **Wild** and free  
Go and take **Care** of them and hurry  
On the way you should show the others  
How to recycle. All your sisters and brothers  
Show them how to put the paper and glass  
In the proper container and not the trash  
If this all you are able to do  
Your planet will thank you  
Stop on your way  
And see the Bay  
Perhaps you should use a bicycle  
This would leave you in a pickle  
Because you have a very long way to go  
Before the exit that you are aiming fo'  
In case you missed the point  
An animal hospital is the joint  
At **Albert's** strong request  
You need to **Park** west  
If all the nurses have gone home

# The Environmentalists

Albert will bring you a bone

10.

You are not looking for a new career  
You do not have that good of an ear  
Still it seems  
It's in your dreams  
To sing this *island* song  
With those that belong  
To your mission in this rally  
Sing now and head for the finale  
Locate the local *Jungle* of bliss  
Do not make a bungle of this  
Versify at the Flower and the President  
Do it before your voice is spent  
Wayne calls for Water at 2:15  
Serve it well for your team  
Taking heed of earth's *vibrations*  
An earthquake would be animation  
To bring the truth you know so well  
Of how earth is going straight to hell

11.

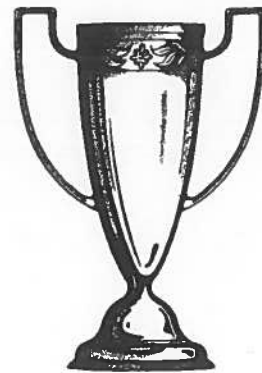

If you didn't get the right route  
People will continue to pollute  
The oceans, seas and air  
Hope you know how to fare  
Up the First One  
Until it is done  
And on way up the pass  
Seeing Tomales at last

# The Environmentalists

Telling your story to the **Coast**  
At this point you cannot boast  
Trying to find the deep Shoreline  
Which is right out of the blind  
Continuing on the windy road  
Careful of the fog you are told  
Just before the world reaches the end  
A **Marina** on the **Ocean** ascends  
But, it's up this road you use  
If a Rally House is what you choose  
Find the place of four twenty four  
That's it, there ain't no more!!!!

Alas you made it and have not sank  
Now the radio tells you it's a prank  
All set up by some little computer nerd  
Who screwed up the sirens, how absurd!  
But, someone has been to the shelter before  
As you can see by the skeleton on the floor  
And next to it, this little Shell tanker truck  
With a message from the one with no luck  
It tells of Shell Company's ocean oil tankers  
And happenings when they drop their anchors  
Greenpeace has been trying to stop all this  
Perhaps you should give them this notice  
But, where is their convention going to be?  
They should be here and saving the trees  
For this information you go down Myra  
Taking a right on Reposa will do ya  
Then taking a left turn on Teresita  
You catch a glimpse of the fiesta  
Taking place because we are alive  
At Portola a right turn you strive

in shell truck

flyer

Oh this is a disappointment and not elation  
Greenpeace has already left for their vacation  
But the herbs, we hope you have found  
Made you well and brought you around  
You are starting to remember a lady you met  
Didn't she once tell you of a secret  
About some of the loathsome carryings on  
And all the things they look down upon?  
Back up Valencia from which you came  
Turning right to check the shops on the main  
Viewing the great beauty of the city  
And the guy who made electricity  
A left is made  
In the shade  
What is she going to tell you when you talk to her?  
Hoping this is something that will actually occur  
Noticing an interesting homeless person  
A right brings you out of this dispersion  
Into a beautiful Grove of trees  
Hold your nose from the sneeze

Yahoo Herban

At United Nations Fountain:

Phone: Message from Diana:      Rose is not here - she lives in fear  
For all this fuss you know she is to blame Call 510-317-1074 and use her name  
Chip on Message:

Your Rose has caused quite a problem for our company We do not want to change our ways. It would cost too much money. Besides, we'll be dead long before this planet is. But, I can quit this job for a price. I demand a million non-traceable dollars. I need to live comfortably and in nice surroundings, like those serene pictures Ansel Adams used to take. So, pay me now and you'll get her back.

Thank you, Thank you, Rose does cry  
She is too scared to tell you, won't even try  
After that kidnapping and awful trauma  
There is no way she could speak of the drama  
So, Rose is leaving and making her escape  
Going off to visit her family and congregate  
Maybe it's time to take a break  
And think of some other mistake  
That has been made by a dreadful company  
Or you could sit back and enjoy a symphony  
Onto Fourth and Left on Folsom  
Off to get a glass of Molson  
Check the **Three** recycling cans  
At least those are working plans  
Bearing a left at the corner they sit  
Continue to Kearny lickity split  
Hey, wait what about the oceans?  
Thank God! You have a new notion  
He also sailed the ocean blue  
Turn left when the light is through  
You know all the rest  
Because you're the best

Ansel Adams

The fishermen did not want these lions to be free  
To frolic here all day just the way it should be  
Yet here they are all safe and sound  
For the people to watch all year round  
You hope they will remain here and safeguarded  
Helping sea animals is where you should have started  
Thinking about Rose and what should could have said  
Remembering the Brent Spar killed creatures dead  
That was the responsibility  
Of Shell Oil Company  
It's all starting to all come together now  
Rushing off the learn more somehow  
You head for the other side of the pier  
Where there are shops and people who leer  
There is a gallery that has much knowledge  
And just like you, they've been to college  
The *columns of glass* make you stop and ponder  
You ask the person in a voice that's a holler  
**We want to learn about saving the ocean and the seas**  
**Could you be so kind and teach us now, if you please**

Sea Lion Pier

Oh gracious us, you've done a beautiful job  
We just hope it's not all ruined with our mob  
The anniversary party is set to start at noon  
If you ever need our help, please tell us soon  
We understand you're on a mission to save the planet  
We realize that all the humans take it for granted  
It is their obligation, but if you need help, call us  
And thank you so much, once again, for all the fuss  
Out of this park and heading north  
On Arguello you will head forth  
You still have yet to get your message through  
And you are worrying about what next to do  
You helped in the preservation of the sea  
Now animals are your new destiny

Crystal Palace

#### ON THE EARTH PUZZLE

It was so wonderful to see that fantastic view  
The inspiration is just what was needed for you  
And the birds did all their spectacular tricks  
It made you really want to sing some lyrics  
But, not just yet as you have another purpose  
Some animals need help including the tortoise  
Back on Arguello and follow it down  
All the way to the end into army town  
Where tanks and soldiers once had duty  
Left to find Sheridan who's being goofy  
The distinguished gentlemen with the tall hat  
Points to the north and says, "No time to chat"  
You follow the windy road as you read the sign  
Find the great wide orange with the pretty design  
Over the water at the right speed limit  
Under the rainbow that is legitimate  
They are waiting for you to get there  
Fix the critters so north they can fare  
You were in San Francisco and another San  
Is where you are headed now for a deep tan  
The highway spins up to the mountains  
But you exit west at the four fountains  
You're into a quaint town full of old stuff  
The world should be like this instead of so rough  
At the Delightful Cafe is a left to be taken

You might be hungry and little bit shaken  
But first save Tiger Taylor's left little paw  
Then you can have some food in your jaw

Thank you, thank you, Albert cries  
You heeled me up, what a surprise  
Now I can go and swim off with my friends  
But, for you this is definelty not the end  
You have a song to sing and all in blend  
For you are on your very last leg  
This is not time to be so vague  
So sing your heart out to this tune  
Oh which you will be singing soon

Sit right back and you'll hear a tale  
A tale of the palnet earth  
It started with Air Quality  
And what our parks are worth

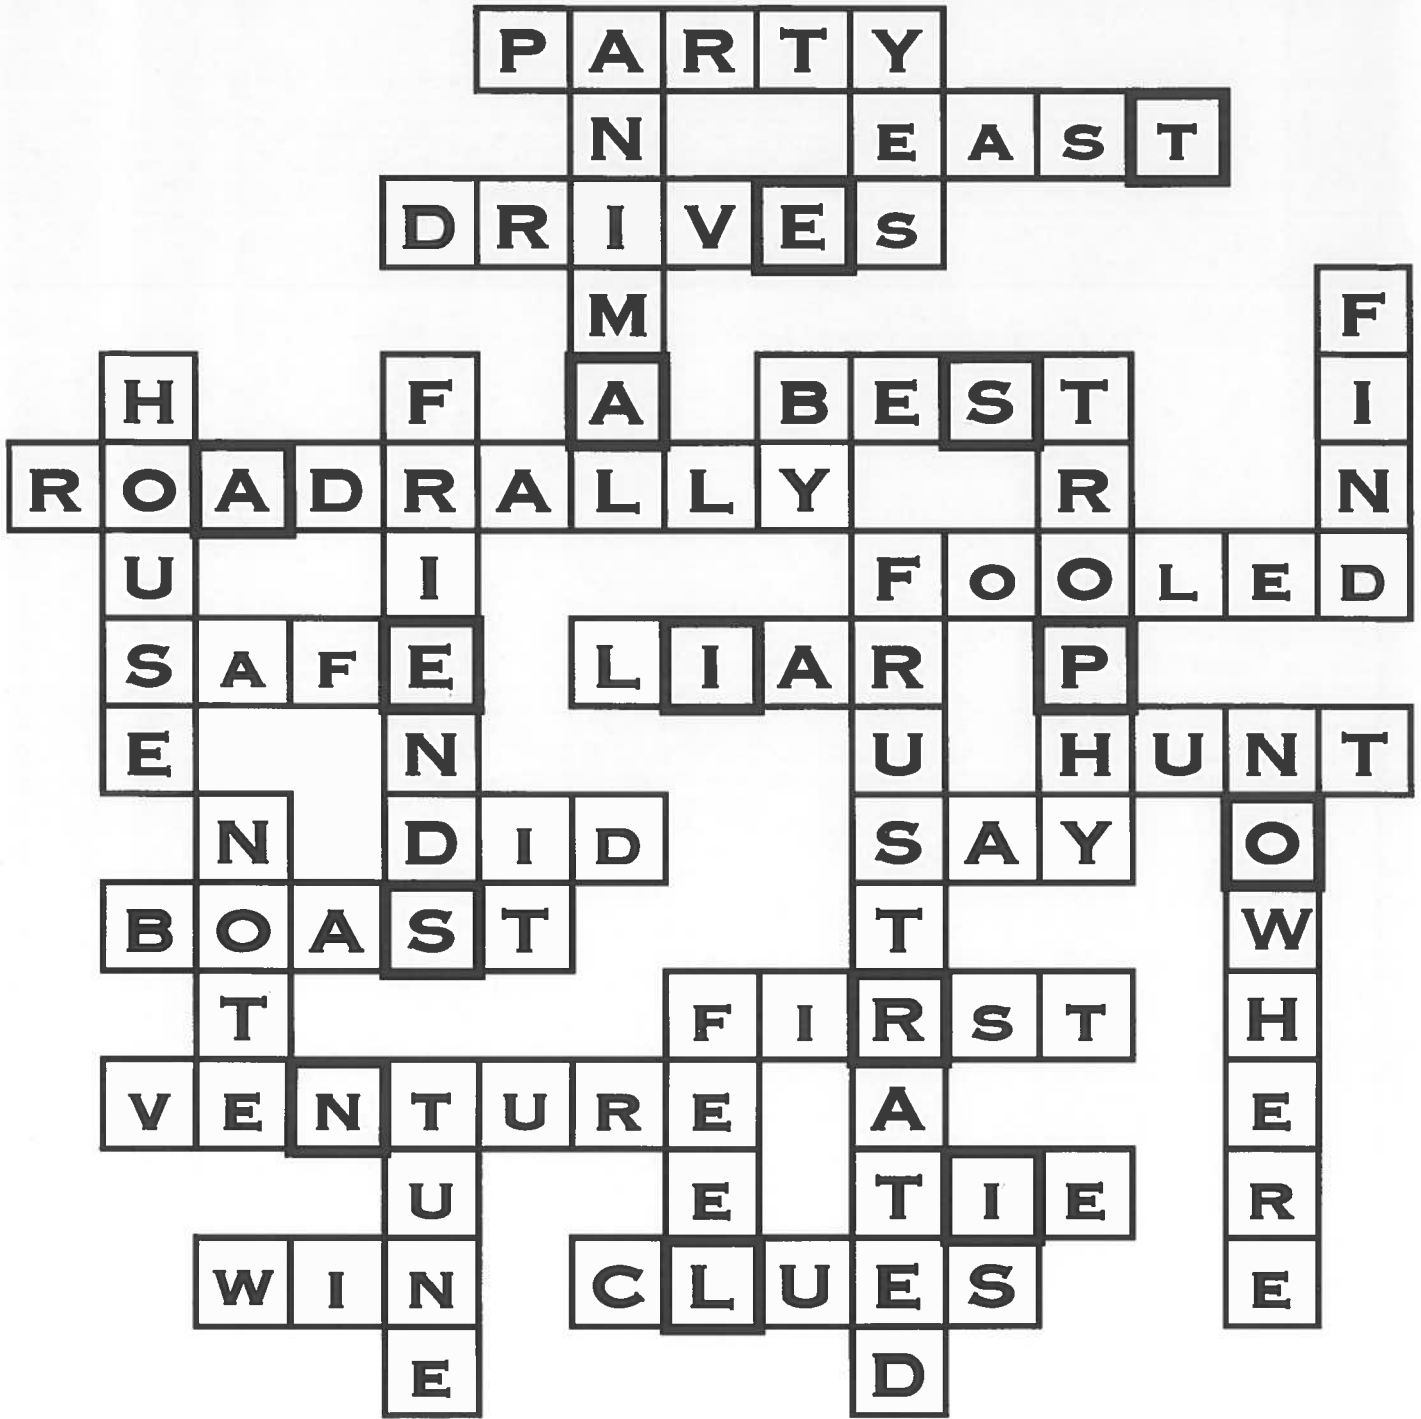

With Greenpeace and Sierra Club  
The earth was up for toss  
Then oil spills from Shell Comp a ny  
Made our seas a loss  
    Made our seas a loss

The ozone started getting thin  
The planet earth was rocked  
If not for the efforts of the EPA  
The ozone would be lost  
    The ozone would be lost

Our mission is quite clear to us  
We hope it's not a bust  
With Aaaa lena  
The Scooter too  
Debb bie and the Mom  
The beat up car and the rest  
Here at Jungle Vibes Store!

In the Alligator  
At Wild Care

SEA LIONS AT PIER
